The screenshot shows the Render dashboard interface for configuring a new web service. The browser address bar displays `dashboard.render.com/web/new`. The navigation bar includes links for Dashboard, Blueprints, Env Groups, Docs, Community, and Help, along with a 'New +' button and the user profile 'Nikhil Bhot'.

The main content area is titled 'You are deploying a web service for SmaranBora/PLANTX.' and includes a note: 'You seem to be using Node, so we've autofilled some fields accordingly. Make sure the values look right to you!'

The configuration form contains the following fields:

- Name:** A unique name for your web service. The value 'PLANTX' is entered.
- Region:** The region where your web service runs. The value 'Oregon (US West)' is selected.
- Branch:** The repository branch used for your web service. The value 'main' is selected.
- Root Directory:** Optional. Defaults to repository root. When you specify a root directory that is different from your repository root, Render runs all your commands in the specified directory and ignores changes outside the directory. The value 'e.g., src' is entered.
- Runtime:** The runtime for your web service. The value 'Node' is selected.

The bottom of the image shows a Windows taskbar with the system clock at 14:46 on 14-04-2024.

The screenshot shows the 'Logs' page for the 'PLANTX' web service. The browser address bar displays `dashboard.render.com/web/srv-codpvugl5elc73fsk7n0/deployments/dep-codpvugl5elc73fsk81g/m=max`. The page title is 'PLANTX / Logs'.

The logs are displayed in a dark theme with a search bar and a 'Live tail' button. The logs show the following sequence of events:
